

a Report, or measure one more concentration

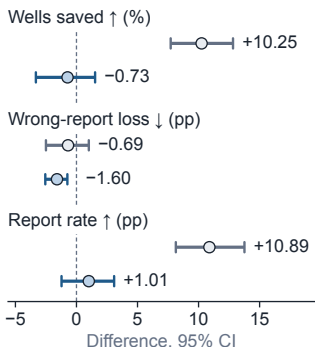

$11,350 + 339 + 430 = 12,119$ wells

three concentrations + fourth + completion · 28,080 if every series were completed

b Wells and reports by strategy

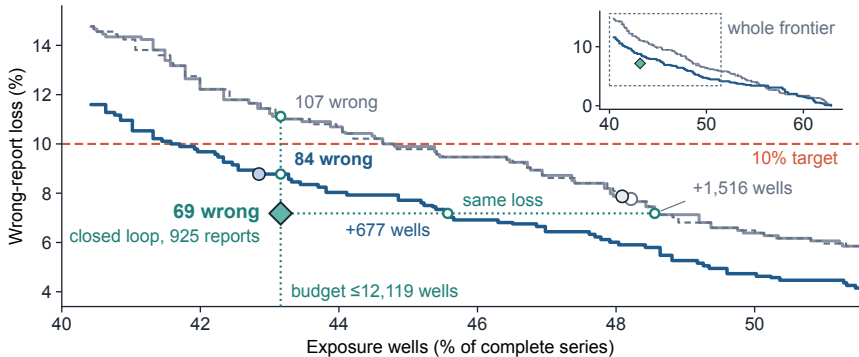

c Closed loop – three-point rule

○ vs measured-only
● vs AnchorBoost

d Fewer wrong reports at the same wells

— AnchorBoost - - - Interpolation ◆ Closed loop
— Measured-only ○ Calibrated working point
